Planeo 120 Comfort Sliding Door System

Can be used for 1 or 2 leaf wooden or glass sliding doors. Glass is securely clamped and does not require any special preparation. The soft closing operation gently guides the doors into their end position and holds them there. Minimum dimensions of the profile and an unobtrusive design integrate the system into any living ambience. Fine ground and anodised aluminium surfaces support the quality of the hardware.

Tested in accordance with DIN EN 1527:2013

What makes this kit so great? No pre drilling of glass is required.. The glass is all held by clamps!!
